DMG / Mori Seiki / Ellison Technologies Northern California Hires New VP of Sales

San Francisco, CA – July 24, 2013 – DMG / Mori Seiki / Ellison Technologies is excited to announce that its Northern California division has hired Tim Stroud as their new Vice President of Sales. Mr. Stroud will lead the sales team and develop strategies to ensure that the company’s customers continue to receive the best solutions and support in the industry. With a Bachelor’s Degree in Business Management, over 18 years of manufacturing experience, and an impressive list of manufacturing certifications, Mr. Stroud is well equipped to grow the team’s capabilities and provide innovative solutions to customers. His out-of-the-box thinking and problem solving skills have helped numerous manufacturing customers expand their businesses.

“Tim brings valuable insight with his extensive experience with global supply-chain development, robotic automation, and process improvement strategies. Having worked for multiple industry-leading companies and with a strong academic background, I am confident that he has what it takes to get the job done at a superior level. We are thrilled to have him join our team!” says Fernando Garcia, President of DMG / Mori Seiki / Ellison Technologies, Northern California.

In addition to receiving over 12 awards for excellence during his 18-year career, Mr. Stroud most recently co-founded an advanced manufacturing company based on the latest developments in factory automation and robotics. His extensive knowledge and experience in the machine tool sector has allowed him to identify paradigm shifts within the industry and can help customers refine their business approach in a way that helps them compete more effectively on a local and global scale. The DMG / Mori Seiki / Ellison Technologies Northern California team is proud to have him on-board.
